

ACHS Clinical Indicators

SECOND HALF 2025

Every six months, the Australian Council on Healthcare Standards (ACHS) benchmarks Clinical Indicator (CI) data against similar hospitals nationwide. Lakeview Private Hospital received **26 Gold Stars** for performance above the national benchmark.

ANAESTHESIA & PERIOPERATIVE CARE CI'S

CI 1.1 Pre-anaesthesia consultation completed by anaesthetist

Number of Actual Events: 11,237

Expected Events: 10,793

CI 3.7 Presence of a trained recovery nurse

Number of Actual Events: 11,237

Expected Events: 11,237

CI 3.5 Unplanned stay in recovery room > 2 hours

Number of Actual Events: 56

Expected Events: 127

CI 4.2 Documented patient handover – OT to Recovery

Number of Actual Events: 11,114

Expected Events: 10,836

CI 4.1 Unplanned ICU admission within 24 hours after procedure

Number of Actual Events: 5

Expected Events: 14

DAY PATIENT CI'S

CI 1.1 Booked patients assessed before admission

Number of Actual Events: 9,525

Expected Events: 8,229

CI 3.2 Cancellation of procedure after arrival due to administration/organisational reasons

Number of Actual Events: 4

Expected Events: 45

CI 2.1 Booked patients who fail to arrive

Number of Actual Events: 5

Expected Events: 31

CI 6.1 Unplanned transfer or overnight admission related to procedure

Number of Actual Events: 10

Expected Events: 38

GASTROINTESTINAL ENDOSCOPY CI'S

CI 1.1 Failure to reach caecum/neo-terminal ileum due to inadequate bowel prep

Number of Actual Events: 2

Expected Events: 30

CI 2.3 Post-polypectomy haemorrhage

Number of Actual Events: 0

Expected Events: 1

CI 1.2 Failure to reach caecum due to pathology encountered

Number of Actual Events: 1

Expected Events: 9

CI 4.1 Possible perforation after oesophageal dilatation

Number of Actual Events: 0

Expected Events: 2

CI 2.1 Treatment for possible perforation post polypectomy

Number of Actual Events: 0

Expected Events: 0

HOSPITAL WIDE CI'S

CI 1.1 Unplanned readmission within 28 days

Number of Actual Events: 5

Expected Events: 80

CI 4.1 Inpatient falls

Number of Actual Events: 12

Expected Events: 46

CI 2.1 Unplanned return to theatre during the same admission

Number of Actual Events: 4

Expected Events: 27

CI 7.1 VTE risk assessment

Number of Actual Events: 16,332

Expected Events: 13,098

CI 8.3 Adult patients experiencing cardiopulmonary arrest

Number of Actual Events: 0

Expected Events: 10

CI 3.1 Inpatients who develop ≥1 pressure injuries

Number of Actual Events: 1

Expected Events: 3

INFECTION CONTROL CI'S

CI 2.1 Timing of SAP for hip prosthesis procedure

Number of Actual Events: 79

Expected Events: 73

CI 2.4 Timing of SAP for knee prosthesis procedure

Number of Actual Events: 210

Expected Events: 188

CI 2.2 Correct antibiotic and dose for hip prosthesis procedure

Number of Actual Events: 79

Expected Events: 73

CI 2.5 Correct antibiotic and dose for knee prosthesis procedure

Number of Actual Events: 210

Expected Events: 190

CI 2.3 Discontinuation of SAP within 24 hours (hip prosthesis)

Number of Actual Events: 79

Expected Events: 69

CI 2.6 Discontinuation of SAP within 24 hours (knee prosthesis)

Number of Actual Events: 210

Expected Events: 181
